YOUR SUCCESS

Typical two vessel brewhouse for traditional beer brewing, where one vessel serves for mashing, wort boiling and whirlpool, and the second vessel for lautering. It is possible to use decoction or infusion mashing for the brewing and brewhouse can brew Lagers and Ales with usual beer gravity, but also extra strong ones.

Brewhouse is also suitable for brewing using adjunct, which can supplement the main mash ingredient up to 30%. As adjunct can be used maltose syrup, unmalted grains, rice and corn.

Brewhouse can be provided with various levels of automatization. Vapor remove can be provided by the chimney or by the vapor condenser.

The size range starts at 5 hl. The maximum size is 30 hl.
